Two Deployment Options

- Capable of operating in both edge (standalone) and distributed (central management system)

V5 System's Portable Streaming Security Unit (V5 PSU-Streaming) is the world's first wireless, multi-sensor, portable security solution. The revolutionary power system consists of 1 kilowatt of onboard battery power and can be perpetually powered by lightweight, bullet resistant V5 solar panels.

This intelligent device has onboard computing, a proprietary power management system, onboard storage and communications. V5 PSU-Streaming units are compact and weigh less than 25 pounds, enabling rapid deployment and re-deployment. V5 PSU-Streaming can be configured and installed in under 30 minutes; all packaged in a ruggedized enclosure for deployment in any outdoor environment without the need for trenching and permits.

V5 devices can be added to extend existing security systems to the outdoors or be deployed as a standalone solution. A truly innovative, off-the-grid technology that is capable of addressing all your security needs.

THE MOST ADVANCED SELF-POWERED OUTDOOR SECURITY SOLUTION

Rapidly deploy pre-configured, self-contained, security units powered with a combination of battery and solar technology to any outdoor environment or cost-prohibitive area without being tied to the electrical grid. Gain immediate insight with 24/7 live video streaming to any smart device.
